LAKE McCONAUGHY

Six state-record fish were hauled from Nebraska's largest reservoir

With 35,000 surface acres, Lake McConaughy is the largest body of water in the state and one of Nebraska's finest fishing areas. With 105 miles of shoreline, the huge reservoir can handle any number of anglers. Located nine miles north of Ogallala, fishing is excellent for white bass and walleye. Rainbow trout are a much sought-after species in the summer and

fall. Smallmouth bass and channel cat add to the creel, and also available are crappie, yellow perch, and northern pike. Six of Nebraska's hook-and-line records came from Big Mac. These include: smallmouth bass, crappie, walleye, northern pike, brown trout, and rainbow trout. Facilities include boat ramps and camping and picnic areas.

FISH STOCKING—It is unlawful for any person, except authorized Game Commission employees, to stock in any manner any live fish in any public waters of the state or to stock any non-game fish in any waters which overflow into or connect in any way to public

4. Landing nets, made of non-metallic mesh, used only for landing fish caught on hook and line.

Bait Minnows

RESTRICTED SPECIES—It is unlawful to sell, transport, or offer for bait any carp, carpsucker, buffalo, gar, goldfish, quillback, or bowfin, and it is unlawful to use any of these fish for bait except in the water from which they are taken.

EXPORTING—No minnows taken from Nebraska waters may be transported out of the state in any manner, except: (a) Minnows artificially propagated in man-made impoundments by licensed fish culturists, and (b) No more than 100 legally captured minnows exported by a resident for his personal use in fishing outside the state.

IMPORTING—No person may import live bait minnows for commercial purposes, or in excess of 100 minnows for any purpose, without first obtaining a "certificate of inspection" from his state game and fish department which certifies the fish are free from disease and parasites. A copy of the certificate must accompany the shipment and the original must be sent to the Nebraska Game Commission not less than three days before the shipment is made, along with the time, date, and place the fish will enter Nebraska. It is unlawful to import or transport carp, carpsucker, buffalo, goldfish, quillback, gar, salamanders, or bowfin into the state for use as bait. A \$10 bait vendor's permit is required for a person to import and sell bait minnows.

BELOW DAMS—The seining or capturing of minnows for commercial purposes for a distance of 200 yards below any dam, check, spillway, or other artificial obstruction is unlawful. This does not restrict individuals from using legal minnow dip nets in these areas to capture minnows for their own personal use.

CLOSED WATERS—Trout streams are closed to the taking of minnows or bait for any purpose (see "Special Areas" section).

VALENTINE AND CRESCENT LAKE WILDLIFE REFUGE—Use of any live or dead minnows or fish and possession of any seine or net for capturing minnows is prohibited.

STATE LAKES

0 miles, attractive spots parallel I-80

Little lakes dot the Interstate 80 from Island to west of Lexington. Closed to fishing by some, they will range from primitive areas to primitive developed. Many are

already producing excellent fishing. Although not all have the same species, fish stocked include smallmouth bass, largemouth, rock bass, and channel cat. Most of these lakes can be reached from Interstate 80.

MERRITT RESERVOIR

Sand Hills lake offers trout, smallmouth bass

Located on the Snake River just before it joins the Niobrara, Merritt Reservoir has proved a mecca for trout fishermen. The 2,700-acre lake is approximately 25 miles southwest of Valentine and has both camping and day-use facilities. An added bonus in the creel are smallmouth bass. This lake has zoomed in popularity since opened to the public in 1964.

SMITH LAKE

This Panhandle hotspot is small but popular

One of the most popular lakes in the Panhandle is Smith Lake, 20 miles south of Rushville. Although only 222 acres, Smith is one of the most easily-reached fishing spots in the region and offers camping and picnic facilities. Creels can include northern, yellow perch, largemouth, crappie, bluegill, and a few bullheads and channel cat. It is also a favorite spot for ice fishermen.

Bulging creels are commonplace at easily-accessible Smith Lake
